

Sai Nath University

Assignment For B.TECH in Electronics & Comm Engineering 3st Sem.

The Assignment will consist of two parts, A and B. Part A will have 5 short answer questions(40-60 words) of 4 marks each. Part B will have 2 long answer questions of 10 marks each

All questions are compulsory.

These Assignments should be completed and submitted in written form by the student to his/her respective Faculty/ Examiners. Assignment Submission Dates are:

➤ Nov-17

List Of Suggested Questions

The list of suggested questions are for students to practice. Although optional, we recommend that students solve these questions, as they will help them in preparing for exams as well as in clearing the important concepts of the subject.

List of Practical and suggested practical's

The list of practical's should be done by the students in their Lab Sessions. These are the basic practical's, which each student should be able to do himself independently. While the list of suggested practicals are optional, but it is recommended that students should perform those practical so as to have a thorough knowledge of the subject

Education Delivery Schedule (EDS)

As per University Semester scheme, the minimum contact hours of each paper has been Divided into two hours theory and practical class.

The faculty will maintain this attendance paper wise for his/her batch.

SUBJECT CODE

SUBJECT NAME

Assignments will be completed by the Student in his/her own handwriting.

BTECE 301 Mathematics-3 Part A

1. Find the local maximum and local minimum, if any, for the function

$$F(x) = \sin x + \cos x, \quad 0 < x < \pi/2.$$

2. Find points at which the tangent to the curve $y = x^3 - 3x^2 - 9x + 7$ is parallel to x-axis.

3. Derive the derivative :-

$$(a) \ y = \sin(\log x^2 + 9x + 1)$$

$$(b) \ y = \sin x^{\cos x} + \cos x^{\sin x}$$

4. Differentiate $\frac{(3x^2 + 2x + 5)}{\sqrt{x}}$

5. Find the first and second partial derivative of $z = x^3 + y^3 - 3axy$.

Part B

$$1. \int_0^a \frac{x^7}{\sqrt{a-x^2}} dx$$

2. Form the differential equation of the family of curves represented by the equation $(2x+a)^2 + y^2 = a^2$.

BTECE 302 Principle of Programming

Part A

1. What is Object Oriented Programming? Explain concepts of object and class, with the help of example of each.
2. What is inheritance? How it provides flexibility in application development? Explain with the help of an example.
3. What is inheritance? How it provides flexibility in application development? Explain with the help of an example.
4. What is multithreading? Explain various applications where multithreading may be used. Also explain how threads are created in java.
5. Explain the situations in which constructors are overloaded, with the help of example.

Part B

1. What is an exception? Explain various causes of exceptions. Explain different types of exceptions.
2. Write a java program to demonstrate handling of multidimensional array in java.

BTECE-303

Signal & Network

Part A

1. Define Signal & types of Signals?
2. Define the System & types of system?
3. What is Laplace Transform & state there ROc of Laplace Transform?
4. Evaluate the Laplace Transform of given function? $x(t)=t$
5. state initial and final value theorem?

Part B

1. Evaluate the Convolution integral of function?
2. Prove the Linearity of the system?

BTECE-304
Digital Electronics
Part A

1. Define logic gates?
2. what do you mean by fan out & TTL logic family?
3. Define BCD Adder?
4. Differentiate between Combinational & Sequential Logic Circuit?
5. Define R_S Flip Flop?
6. Define J-K S Flip Flop?
7. Define RAM, Static Ram & Dynamic Ram?

Part B

1. Demultiplexer ,Decoder,& Encoders?
2. What is ROM & PLA?

BTECE-305
Electrical Machine
Part A

- 1) Explain energy band diagram of insulator, semiconductor and conductor.
- 2) Explain the inverting amplifier application of operational amplifier.
- 3) Give different types of flip fops. Explain any one flip flop in detail.
- 4) Explain Intrinsic and Extrinsic semiconductors.
- 5) Explain the operation of a P-N junction diode in the forward biased condition and draw the forward characteristics.

Part B

1. Draw the circuit diagram of full wave bridge rectifier and draw its input and output waveforms.
2. Draw the block diagram of a regulated D.C. power supply and explain the function of each block in it with relevant waveforms.

BTECE-306 Practical Electronics Part A

1. Wiring and connection of wattmeter and its use
2. Study of logic gate with the help of logic gate kits.
3. Making of Extension Board.
4. Connection of switches fuse and socket on the extension Board.
5. Speed Regulation of fan connection.

Part B

1. Norton's & Thevenin's theorem proof with the help of kit .
2. Solies and parallel connection with the kit present in lab

BTECE-307 Practical Electrical Machine

Part A

1. Determine the shear strength of the given specimen.
2. (a) Determine the Charpy's impact strength for the given specimens.
(b) Determine the Brinnel's Hardness number for the given specimens.
3. (a) Find the Hardness number for the given thin metal sheet.
(b) Determine the IZod impact strength for the given specimen.
4. Conduct a compression test on the given helical spring and determine the following
5. Determine the Young's modulus of the material of the steel beam by conducting the deection test.

Part B

1. Determine Rockwell Hardness number for the given specimens
2. Conduct the tension test on MS rod and determine the following values (a) yield stress (b) ultimate stress
