

Company – Navitasys India Private Limited. (A TDK Group Company)

A world-class lithium battery service provider, Dongguan NVT Technology Co., Ltd. (NVT) is a wholly owned subsidiary of Hong Kong New Energy Technology Co., Ltd. Established in September 2009, NVT develops innovative, best-in-class energy solutions for consumer electronics, electric drives, smart energy storage and environmental projects. Servicing customers all over the world, NVT maintains deep strategic relationships with several leading domestic and foreign brands. NVT uses advanced concepts and technologies to set new benchmarks in clean energy and recycling, and its technical team leads the industry in cell application research, BMS research and development, ID design and mechanical design, manufacturing technology and automation equipment development. Leveraging our rich Chinese heritage, we aim at becoming a world-class innovation and technology company and intend to make outstanding contributions in developing a new, human-centric, energy business. We are also committed to meeting the spiritual and material well-being of our employees.

About Group Company - TDK Group:

TDK Electronics (previously EPCOS) develops, manufactures and markets electronic components and systems under the product brands of TDK and EPCOS, focusing on fast-growing leading-edge technology markets, which include automotive electronics, industrial electronics and consumer electronics as well as information and communications technology. Thanks to the 22,900 employees at some 20 design and production locations and an extensive sales network, the company is globally positioned – beyond the provision of standard products – to work closely with customers and create the right solutions for them.

In fiscal 2019 (ending in March) TDK Electronics posted sales of about EUR 1.7 billion.
